## Trello overview

Trello was used as the primary Agile requirements management tool for this effort. The Trello board used for this effort (and the full history log of all changes made during prototype development) can be found on the following publically-available link: <https://trello.com/b/gb1av8iH/gsa-18f-prototype>.

The Trello history will show work flowing through the progression of statuses with items in the “Prioritized Backlog” being added and re-prioritized throughout the week as users provided input, requested new features, or identified bugs to be fixed.

## Incorporating User Feedback

Users provided feedback and change requests in the form of sticky notes. The Product Owner incorporated these change requests into Trello as shown in the sample image and screenshot below. Images of the associated sticky notes were also associated with each Card in Trello.

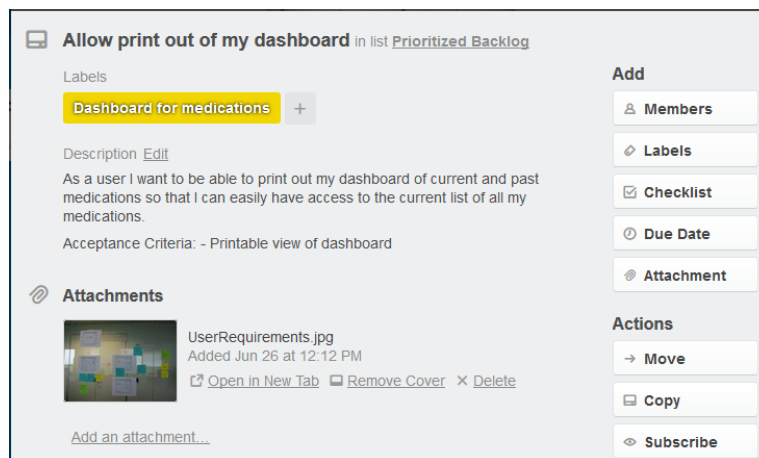

### Criteria g:

used an iterative approach, where feedback informed subsequent work or versions of the prototype

*Input received from end users*

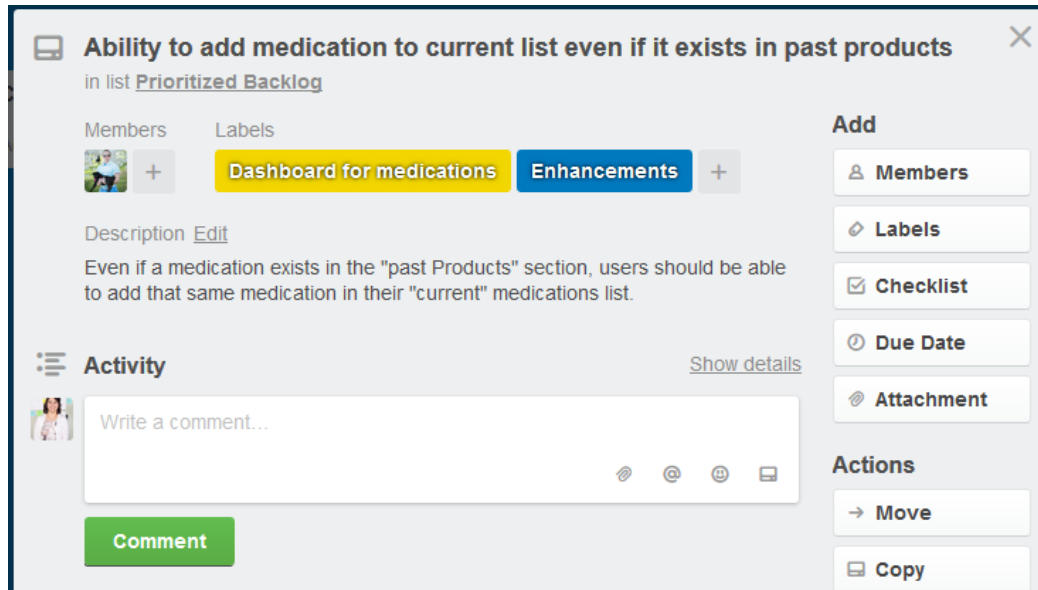

*Sample User feedback incorporated as a Card in Trello (with photo of corresponding sticky note)*

## Incorporating Bug Fixes and Enhancement Requests

Similar to User Stories, bug fixes and enhancement requests were entered into Trello for tracking and planning purposes. The labels were used to identify each Card as an enhancement or bug with the associated labeling for the Epics.

Criteria g:

used an iterative approach, where feedback informed subsequent work or versions of the prototype

*Sample enhancement card in Trello*

## User Stories Completed Per Sprint

While we have made our Trello board publically available, we recognize it may be difficult to iteratively trace Sprint-by-Sprint work progress by reviewing only the Trello Activity Log. We are providing the additional tables below to show a day-by-day summary of the work items completed each day (which were then demonstrated to real users at the Review).

### Sprint 1 – June 22, 2015

User Story Title	User Story
<b>Search bar for my Medication/device based on name</b>	As a user I want to be able to search for my medication so that I can view available information on my medication/devices.
<b>Provide an at a glance view for care givers</b>	As a caregiver I want to be able to search for a medication or device and view the outcomes at a glance so that I can find out information about the product quickly.
<b>Display disclaimer</b>	As a developer I will display the disclaimer stating that the information is in beta research so that users are aware of the type of information they are using.
<b>Display detailed view for Product</b>	As a user I want to access a detailed view for each product so that I can access all information available on each product on one page.

Criteria g:

used an iterative approach, where feedback informed subsequent work or versions of the prototype

### Sprint 2 – June 23, 2015

User Story Title	User Story
<b>Add search bar and disclaimer to the heading of all pages</b>	As a user I want to be able to search for medications/devices from any page so that I can easily add products to my dashboard.
<b>Display list of adverse events on detailed view</b>	As a user I want to view a list of adverse events reported for my product so that I know what others have reported on each product.
<b>Register User</b>	As a developer I will register users so that they are able to create an account and log in to view their dashboards.
<b>Authenticate User</b>	As a developer I want to be able to authenticate users so that their identity can be verified.
<b>Create Login</b>	As a user I want to be able to create a profile so that I can submit all of my information and have the ability to elect to receive notifications.

### Sprint 3 – June 24, 2015

User Story Title	User Story
<b>Display Medication Description</b>	As a user I will be able to view a description for my medication on the detailed view.
<b>Ability to add products to the dashboard from detailed view</b>	As a user I want to be able to add medications/products to my list of medications after searching for it so that I am able to add the product to my dashboard.
<b>Display Label Warnings</b>	As a user I want to be able to view labeling information for my products so that I am aware of instructions for each product.
<b>Add search bar to the heading of all pages – Detailed view</b>	As a user I want to be able to search for medications/devices from any page so that I can easily add products to my dashboard.
<b>Listing of all current medication</b>	As a user I want to see a section on the dashboard listing all of my current medications so that I can view all of my current products in one section of the screen.
<b>View recent alerts</b>	As a user I want to see the 5 most recent alerts on the dashboard so that I am aware of the latest available information on my products.

Criteria g:

used an iterative approach, where feedback informed subsequent work or versions of the prototype

<b>Display list of enforcement reports on detailed view</b>	As a user I want to view a list of enforcement reports so that I am aware of any open recalls on all of my products.
<b>Add search bar to the heading and disclaimer to the footer of all pages – Dashboard page</b>	As a user I want to be able to search for medications/devices from any page and view the disclaimer so that I can easily add products to my dashboard.

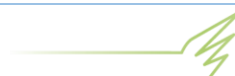

Sprint 4 – June 25, 2015

User Stories Completed

User Story Title	User Story
<b>Ability to create account from at a glance view</b>	As a caregiver I want to be able to create an account from the at a glance view so that I can create an account and add my current search and not have to start a new search.
<b>Edit Products from dashboard</b>	As a user I want to be able to edit the products listed on my dashboard, so that I can make changes as I need.
<b>List of past products</b>	As a user I want to see a section on the dashboard listing all of my past medications/devices so that I can view all of my past products in one section of the screen.
<b>Show graph depicting number of adverse events</b>	As a user I want to view a graph depicting the number of adverse events over the past 1 year so that I can view the trend of side effects made for my product.
<b>Show graph depicting number of recalls overtime</b>	As a user I want to view a graph depicting the number of recalls over the past 1 year so that I can view the trend of recalls made for my product.

Bugs/Enhancements completed:

Bug or Enhancement	Description
<b>BUG</b>	When a user creates a new account they should remain logged in
<b>ENHANCEMENT</b>	Logo should remain the same size on all screens
<b>ENHANCEMENT</b>	Clicking on My Health Alerts icon should take user to the dashboard and non user to search page
<b>BUG</b>	Remove "show more" link from list of side effects when there are no side effects

Criteria g:

used an iterative approach, where feedback informed subsequent work or versions of the prototype

<b>BUG</b>	Increase width of label warnings section
<b>BUG</b>	Only allow one occurrence of medication on dashboard
<b>BUG</b>	Remove term "Warnings" from the result of warning labels
<b>ENHANCEMENT</b>	Return "No recalls reported" when there are no recalls
<b>BUG</b>	Remove duplicate reactions from side effects list
<b>BUG</b>	Remove "Return to dashboard" link from detailed view when user is not logged in

Sprint 5 – June 26, 2015 – Hardening / Bug Fixes

Bug or Enhancement	Description
<b>Bug</b>	Recent Recalls is not showing any recalls
<b>Enhancement</b>	UI edits on Details Page
<b>Bug</b>	Move Email and Password label from inside the field to outside
<b>Enhancement</b>	Provide password parameters BEFORE users try to create a password
<b>Enhancement</b>	Chrome – When looking at "Create Account", user registration box has unnecessary scroll bar at bottom
<b>Enhancement</b>	Ability to add medication to current list even if it exists in past products
<b>Bug</b>	Confirm deletion from dashboard
<b>Bug</b>	Start Date and End Date inputs are truncated on add to dashboard
<b>Enhancement</b>	Rename Edit to Save on "End Usage" screen
<b>Enhancement</b>	Change "return to my dashboard" to "My Dashboard"
<b>Bug</b>	Line Chart needs to be renamed
<b>Enhancement</b>	Update text on Search page
<b>Enhancement</b>	UI Edits on Search page

Criteria g:

used an iterative approach, where feedback informed subsequent work or versions of the prototype
