

# Criteria for performed usability tests with people

*Doing What's Right—Doing What Works*

Criteria f:  
performed usability tests with people

A system usability test was conducted with a group of 13 users in order to get input from users on myHealthAlerts. The first round of surveys was conducted at the start of Development Day 4 and the second round of surveys was done at the end of Day 5 which was the development hardening day. The users were asked the following questions:

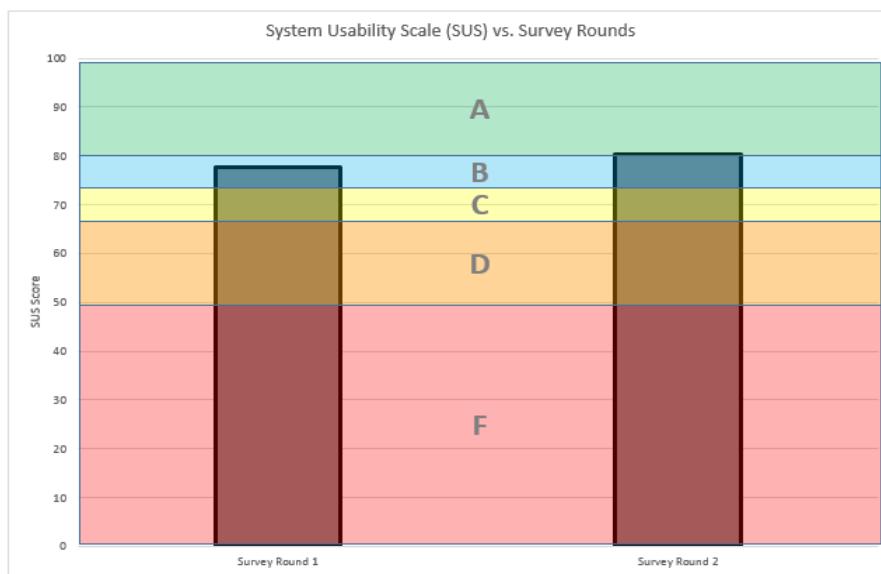

1. I think that I would like to use this system frequently.
2. I found the system unnecessarily complex.
3. I thought the system was easy to use.
4. I think that I would need the support of a technical person to be able to use this system.
5. I found the various functions in this system were well integrated.
6. I thought there was too much inconsistency in this system.
7. I would imagine that most people would learn to use this system very quickly.
8. I found the system very cumbersome to use.
9. I felt very confident using the system.
10. I needed to learn a lot of things before I could get going with this system.

They were asked to respond to each question using the following scale:

Strongly Disagree 1	2	3	4	Strongly Agree 5
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

*Rating scale used for surveys*

The outcome survey results from the two rounds were as follows:

*Survey Results*

**Criteria f:**  
**performed usability tests with people**

myHealthAlerts received a score of 77.69% (B) on the first round and a score of 80.42% (A) on the second round. All of the surveys are shown below, a total of 13 for round 1 and 12 for round 2. Please note that the same user group was used for both rounds of surveys.

Criteria f:  
performed usability tests with people

### **Were there any tasks that you enjoyed and found easy to complete?**

Adding a medication was really straightforward

### **Were there any tasks that were difficult or you were unable to complete?**

Took a while to find a medication that would search. A lot of the options kept giving "An error has occurred".

### **Suggestions for improvement**

### **Additional comments**

Looks good, quick responsiveness

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
I think that I would like to use this system frequently.					
I found the system unnecessarily complex.					
I thought the system was easy to use.					
I think that I would need the support of a technical person to be able to use this system.					
I found the various functions in this system were well integrated.					
I thought there was too much inconsistency in this system.					
I would imagine that most people would learn to use this system very quickly.					
I found the system very cumbersome to use.					
I felt very confident using the system.					
I needed to learn a lot of things before I could get going with this system.
